## M910 Mobile Phone

Operating Manual

Please read and observe the following information and keep the operating manual nearby for future reference!

Safety information

⚠ WARNING!

- **Risk of explosion!**
- ➡ **Only use the power adapter plug supplied!**
- ➡ **Only use the battery supplied or ones of the same type!**
- ➡ **Always treat batteries with due care and attention and only use them as described.**

- **Risk of fatal injury with heart pacemakers!**
- ➡ **Always keep the phone a minimum safety distance of at least 15 cm to heart pacemakers.**

- **Risk of suffocation through small objects, packaging and protective foil!**
- ➡ **Keep children away from the product and its packaging!**

- **Batteries represent a hazard to health and the environment!**
- ➡ **Never open, damage or swallow batteries or allow them to pollute the environment.**

⚠ CAUTION!

- **Risk of hearing damage!**
- ➡ **Avoid listening at full receiver volume.**

ATTENTION!

- **Risk of property damage.**
- ➡ **Prevent exposure to environmental influences, e.g. smoke, dust, vibration, chemicals, moisture, heat and direct sunlight.**
- ➡ **Only allow repairs to be completed by qualified personnel.**
- **i** Please note that certain services must be activated by your mobile service provider before they can be used.

Intended use

This mobile phone is designed for telephoning and sending/receiving SMS messages when connected to a mobile phone network. Any other use is considered unintended use. Observe all local directives and regulations. Unauthorised modification or reconstruction is not permitted. Under no circumstances open the device or complete any repair work yourself.

Package contents

- 1 Mobile phone
- 1 li-ion battery
- 1 Charger

- 1 USB cable
- 1 Headset
- 1 Instruction manual

Inserting the SIM card and battery

> **ATTENTION!**
> • The SIM card could be damaged.
> ➡ Pay attention that the SIM card remains clean and undamaged. Insert the SIM card the correct way around.
> • The battery or phone could be damaged.
> ➡ Pay attention that the battery is inserted correctly.

Switch the mobile phone off before removing the battery compartment cover. Only switch it on again when the battery compartment cover has been replaced.

➡ Install the battery and SIM card as shown in Figures A to C.
➡ Install the battery compartment cover.
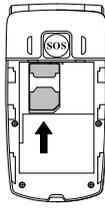

Fig. A: Remove the battery compartment cover

Fig. B: Insert the SIM card
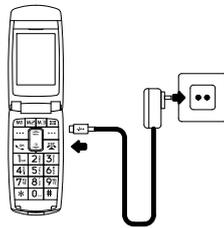

Fig. C: Insert the battery

Fig. D: Charge the battery

Charging the battery

> **ATTENTION!**
> ➡ Observe the safety instructions provided at the beginning of this manual.

ℹ When charging the battery for the first time, it should be charged for at least 12 hours. Aid a long service life of the battery by allowing the battery to fully discharge and then recharge it completely.

➡ Connect the power adapter plug according to Fig. D.

Display and notation of operating sequences

🔔	Icon in the display (example)

Standby mode

The system switches to Standby mode by pressing the 📞ᴱˢᶜ key, several times if necessary.

The display switches off after a certain time in Standby mode. It appears again after pressing any key.

ℹ All the descriptions in this manual assume that the mobile phone is in Standby mode and that the key lock is deactivated.

Entering text

The keys on the keypad are also labelled with letters for the entry of text.

ℹ The mobile phone is provided with various methods with which to enter text. Not every method is always available for each application.

Entering text and digits with the multitap function

➡ Press the key containing the letter required as often as necessary until the letter appears in the display. If you want the "A" for example, press the 2 key once; if you need the "B", press the 2 key twice, and so on.

➡ To enter a further character assigned to the same key, wait approx. 2 seconds after entering the first character, until the cursor has moved to the next position.

➡ Then enter the next letter in the same way as described above.

Entering text with text entry aid

➡ When the text entry aid is active, it is only necessary to press the key with the desired letter once. Then continue immediately with the next letter. The text entry aid attempts to recognize the word you want. The recommendations are displayed. Select the correct recommendation with 🔘 / 🔘 and insert it into the text with Select.

Switch between text entry methods

➡ #

Display indicators for text entry

The display indicates which input method is active and whether text will be entered in upper and/or lower case:

• !ABC Upper case only
• !abc Lower case only
• ⁵!ABC Upper case only with text entry aid
• ⁵!abc Lower case only with text entry aid
• !123 Entry of digits

ℹ The text entry methods are also available in various languages, indicated by the corresponding letters.

Voicemail / Mailbox

A Voicemail or Mailbox is a digital answering machine. If this service is activated at your mobile phone provider's, you are notified immediately when ever a message is present in our Voicemail or Mailbox. You are given the call number for your voicemail or mailbox inquiries together with the SIM card from your mobile service provider.

Saving the Voicemail/Mailbox call number

➡ (Menu) ≣▸ | Messages | ≣▸ | SMS settings | ≣▸ | Voicemail server | ≣▸ [Select voicemail memory] ≣▸ | Edit |
➡ 🗐 🗐 | Number | ⌨ Entering the Voicemail/Mailbox number (OK)

Playing messages on the Voicemail/Mailbox

When you have stored the Voicemail number:

➡ 2 sec. | 1 | ➥ Connect completed to Voicemail.

Or:

➡ (Menu) ≣▸ | Messages | ≣▸ | SMS settings | ≣▸ | Voicemail server | ≣▸ [Select voicemail memory] ≣▸ | Call voicemail |

Additional functions

Call list

Outgoing, received and missed calls are stored in a call list.

ℹ You can open the list | All calls | in the standby mode with the ↙ᴼᴷ key.

Detailed view of call list entries

➡ (Menu) ≣▸ | Call Centre | ≣▸ | All calls | / | Missed calls | / | Dialled calls | / | Received calls | ≣▸ [Select entry] ≣▸ | View |

Security settings

ℹ The PIN is supplied together with the SIM card by your mobile service provider.

Switching the PIN password on/off

➡ (Menu) ➡ | Settings | ➡ | Security settings | ➡ | SIM lock |

➡ [Enter PIN1] (OK)

Switching phone code lock on/off

If you have activated the phone code lock on your mobile phone, it is necessary to enter the password in addition to the PIN, when switching on your mobile phone.

i The default setting for the phone code is **0000**.

➡ (Menu) ➡ | Settings | ➡ | Security settings | ➡ | Phone lock |

➡ [Enter phone code] (OK)

Changing PIN / PIN2 / phone code

➡ (Menu) ➡ | Settings | ➡ | Security settings | ➡
| Change password | ➡ | PIN | / | PIN2 | / | Phone password |

➡ [Enter old PIN1/PIN2/phone code] (OK)

➡ [Enter new PIN1/PIN2/phone code] (OK)

➡ [Confirm new PIN1/PIN2/phone code] (OK)

SOS (emergency call) settings

You can enter up to 5 emergency call numbers to be dialed one after the other when an emergency call is activated, until one of the numbers called answers the emergency call. If the emergency call is not answered within approx. 3 minutes, a new emergency call to the local rescue service is started.

It is also possible to compile an SOS text message which is sent together with the SOS calls.

Enter / change emergency call numbers

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡
| SOS numbers setup |

➡ ➡ [Select memory location] ➡ | Edit |

➡ (Search) [Select phone book entry] (OK)

i You can also enter a phone number directly and confirm your entry with (OK).

Delete one / all emergency phone number(s)

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡
| SOS numbers setup |

➡ ➡ [Select memory location] ➡ | Clear | / | Delete all | (OK) [Confirm prompt]

Preparing the emergency text message

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡ | SOS smscontent |

➡ ➡ [Select message]

➡ [Enter emergency text message] (Options) ➡ | Done |

Switching the SOS function on/off

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡
| SOS numbers setup |

➡ / | Status | (On) / (Off)

Enter / change public emergency call numbers

i The default emergency phone number is set to 112. Be careful not to trigger a public emergency call unintentionally!

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡
| Public emergency number | ➡ | SOS numbers setup |

➡ [Enter phone number] (OK)

Changing public emergency call number

➡ (Menu) ➡ | Settings | ➡ | SOS setting | ➡
| Public emergency number | ➡ | SOS smscontent |

➡ [Enter emergency text message] (OK)

Triggering an SOS call

➡ 3 sec.

↪ An announcement is made, that a call has been activated.

↪ If you have prepared an emergency text message, it is sent.

↪ An acoustic signal sounds.

↪ The phone numbers entered are dialled one after another.

↪ When the emergency call is answered, the siren is muted and the call switched to speakerphone.

If none of the emergency phone numbers answers the emergency call, the phone number saved as the public emergency phone number is dialled after approx. 3 minutes.

Aborting SOS call

➡ ESC

i If the emergency call is aborted, the public emergency phone number is still dialled after approx. 3 minutes.

Ending the SOS call

➡ 3 sec. ✱ ➡ An announcement is made that the emergency call has been terminated.

Service hotline

In the case of technical problems, contact our Service hotline.
Switzerland: Tel. 0900 00 1675 (national charges, Swisscom at time of going to print: CHF 2.60/min).
In the case of claims under the terms of guarantee, please contact your sales outlet.

Technical properties

Technical data

Feature	Value
Standard	- GSM 900, 1800 MHz Dualband
Dimensions (W x H x D)	- 52 x 108,3 x 17,3 mm
Weight	- 106 g (including battery)
Power supply	- Input: 100-230 V, 50-60 Hz, 0.2 A
	- Output: Mini USB 5 V, 700 mA
Battery	- 3.7 V, 1000mAh
Standby time	- up to 200 hours
Max. talk time	- up to 180 minutes

Power adapter plug

Your mobile phone is equipped with an energy-efficient power adapter plug UT-003E-698 (input 100-240 V_{AC}, output 5 V_{DC}, 500 mA). The zero load is approx. 0.18 W. The average efficiency is approx. 68.2 %. The power consumption while charging the mobile phone is approx. 1 W.

SAR information

Information on radio frequency emissions and specific absorption rates (**SAR** = **S**pecific **A**bsorption **R**ate).

All the applicable safety standards related to radio frequency emissions were implemented during the development of this mobile phone. The limit values are based on scientific directives and contain a safety margin in order to guarantee the safety of all persons regardless of age and state of health.

The specified values established according to the directives on radio frequency emissions are based on a measurement unit referred to as SAR. SAR values are established using standard methods in which the phone is operated in all possible frequency bands with the highest power output.

Although the SAR values of various phone models can differ, all the models were developed to maintain the relevant directives on radio frequency emissions.

The following information applies to residents of countries which, as with the European Union, have adopted the SAR limit value recommended by the IC-NIRP (**I**nternational **C**ommission on **N**on-**I**onizing **R**adiation **P**rotection) which lies at 2 W/kg (averaged from 10 gram tissue:

The highest SAR value measured, averaged over 10 g tissue, was 0.237 W/kg for this mobile phone measured at the ear.

Maintenance

➡ Clean the surface of the housing with a soft, fluff-free cloth.

➡ Do not use any cleaning agents or solvents.

Disposal

In order to dispose of your device, take it to a collection point provided by your local public waste authorities (e.g. recycling centre). According to laws on the disposal of electronic and electrical devices, owners are obliged to dispose of old **electronic and electrical devices** in a separate waste container. The adjacent symbol indicates that the device must not be disposed of in normal domestic waste!

You are legally obliged to dispose of power packs and batteries at the point-of-sale or in the corresponding containers provided at collection points by the public waste authorities. Disposal is free of charge. The symbols indicate that the batteries must not be disposed of in normal domestic waste and that they must be brought to collection points provided by local public waste authorities.

Packaging materials must be disposed of according to local regulations.

Guarantee

SWITEL equipment is produced and tested according to the latest production methods. The implementation of carefully chosen materials and highly developed technologies ensure trouble-free functioning and a long service life.The terms of guarantee do not apply when a device malfunction was caused by the mobile telecommunications network operator/provider. The terms of guarantee do not apply to the batteries or power packs used in the products. The period of guarantee is 24 months from the date of purchase.

All deficiencies related to material or manufacturing errors within the period of guarantee will be redressed free of charge. Rights to claims under the terms of guarantee are annulled following tampering by the purchaser or third parties. Damage caused as the result of improper handling or operation, normal wear and tear, incorrect positioning or storage, improper connection or installation or Acts of God and other external influences are excluded from the terms of guarantee. In the case of complaints, we reserve the right to repair defective parts, replace them or replace the entire device. Replaced parts or devices become our property. Rights to compensation in the case of damage are excluded where there is no evidence of intent or gross negligence by the manufacturer.

If your device shows signs of defect during the period of guarantee, please return it to the sales outlet in which you purchased the SWITEL device together with the purchase receipt. All claims under the terms of guarantee in accordance with this agreement can only be asserted at the sales outlet. No claims under the terms of guarantee can be asserted after a period of two years from the date of purchase and hand-over of the product.

Declaration of Conformity

This device fulfils the requirements stipulated in the EU directive 1999/5/EC concerning radio equipment and telecommunications terminal equipment and the mutual recognition of their conformity. Conformity with the above mentioned directive is confirmed by the CE mark on the device. To view the complete Declaration of Conformity, please refer to the free download available on our web site at www.switel.com.
